SoundTap Streaming Audio Recorder

Record audio playing through your computer

SoundTap is streaming audio capture software which will convert any audio playing through your computer to mp3 or wav files. Streaming audio is recorded by a special kernel driver to preserve digital audio quality.

Streaming Audio Recording Applications

- ▶ **Record internet radio webcasts.** Radio stations are required to log and archive all broadcasts under FCC regulations.
- ▶ **Save streaming audio broadcasts.** If you are using [BroadWave](#) to broadcast your band, SoundTap can record and archive the broadcasts.
- ▶ **Record streaming audio conferences.** SoundTap works perfectly to record conferences hosted with our [Quorum Conference Server](#).
- ▶ **Convert audio from uncommon formats** to wav or mp3. e.g., Convert a voice recording in ds2 format to mp3 using a ds2 player and SoundTap.
- ▶ **Record VoIP phone calls** made with Skype or [Express Talk softphone](#). This is often done in businesses or call centers for quality assurance.

Streaming Audio Recorder Features

- ▶ Record audio played on your computer in direct digital with no quality loss
- ▶ Saves files in wav or mp3 format with a wide range of selected codec and compression options
- ▶ Ability to record and mix microphone input to capture both sides when recording a VoIP or Conference conversation (optional)
- ▶ Streams can be recorded directly to the [VRS Recording System](#) for enterprise database system use
- ▶ Works with all popular media players (e.g., Windows Media Player, Real Audio, QuickTime) and softphones (e.g., Skype, [Express Talk](#))
- ▶ Directly links to [WavePad Sound Editor Software](#) so you can edit the files you have recorded
- ▶ Directly links to [Switch MP3 File Converter Software](#) so you can convert the files from mp3 to over 20 other file formats

* SoundTap complies with Microsoft's DRM signed driver model and will not record streams if a DRM player is used and if the stream is marked as DRM copy-protected.

System Requirements

- ▶ Works on **Windows 7**, XP, Vista, 8, 8.1 and 10
- ▶ Works on **64 bit** Windows
- ▶ Mac OS X 10.4 and above

Top Features

See how SoundTap can work for you

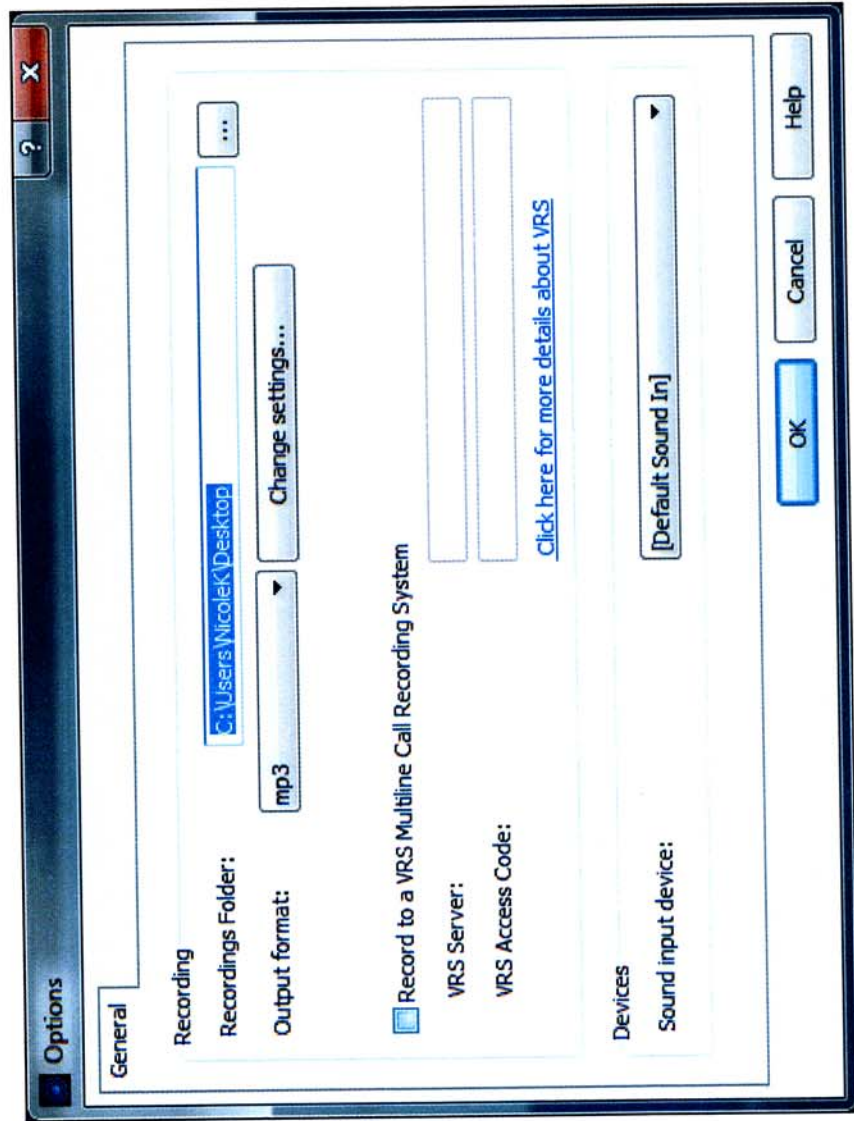

Record any audio playing through your computer in pure digital

SoundTap's simple interface lets you record streaming audio from your PC with ease. To record and audio stream, simply press the 'Start Recording' button. A red light will appear to indicate that SoundTap is recording. To stop recording, simply press the button again. Its as easy as that!

[Download Now](#)

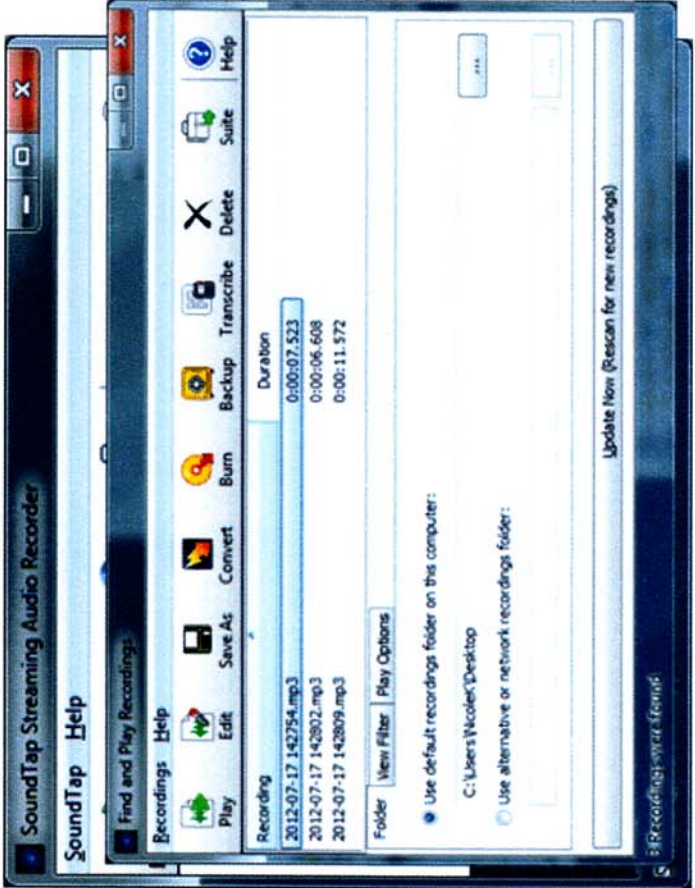

Settings

SoundTap allows you to listen to the streaming audio live whilst you are recording. You can record in either wave or mp3 format. Later, you may wish to transfer your recording to a portable mp3 player to listen to when you are out and about.

Find and Play Settings

Included with SoundTap is the easy to use 'Find and Play' function where you can search your recorded audio files by date, duration or file type. You can then edit recordings or burn to CD (handy for listening to in the car).
